

# PHILLIP MARDIS

(662)296-0705 | P.L.MARDIS@GMAIL.COM

Full-stack developer who is creative, motivated, and ready to integrate into a team of like-minded developers. Core competencies include delivering high-performance, low-cost browser, server, and database solutions, while designing and integrating creative, dynamic, and easy to use UIs to create effortless and memorable end user experiences.

Fluent in Python, Javascript, and Django Stack, as well as competent with OOP including Java. Adept at utilizing front end scripting along with Bootstrap plus newer, more flexible, un-styled component libraries to create seamless integration of elements while maintaining functionality and accessibility.

Key strengths include communication, both verbal and written, working inside different Agile and Scrum project organizational structures, and flexibility and adaptability, which allows for dynamic shifting between a variety of roles to suit the ever-changing needs of a project.
